## **Conferences & General Information**

\* The 14th *International Sport Sciences Congress* which will be organized in Antalya, TUR. See this link for more information: <http://www.sbk2016.org/en/index.php>.

\* Call for abstracts (chapters): *Contemporary Developments of Digital Technology in Physical Education and Sport* Researchers of the Human Movement and Education Research Centre at Windesheim University of Applied Sciences Zwolle (NED) have written a proposal to publish a book (English language), based upon a research project called "*Digital Technology in Physical Education and Sport*." During the recent **AISEEP** World Conference in Laramie (June 2016) two parallel sessions showed a growing interest among physical educators and youth sport coaches in the incorporation of digital technology in their daily practice. Physical educators are becoming increasingly interested in technology, but oftentimes remain inadequately equipped to effectively integrate new technological resources in their daily practice, and/or lack the practical knowledge of the potential benefits of these digital resources. The working title of the proposed book is *Contemporary Developments of Digital Technology in Physical Education and Sport*. This book will offer a comprehensive and critical perspective on issues regarding the application of digital tools, serious games, and evidence informed practices in the field of physical education and sport. The book consists of contributions that are theoretical, research and practice based. The editors invite researchers and practitioners in the field of PE and Sport to contribute with an English written chapter to the book. For further information or authors who want to show their interest (by sending a 300 words abstract), please contact the editors of the book, Jeroen Koekoek / Ivo van Hilvoorde (contact: [jh.koekoek@windesheim.nl](mailto:jh.koekoek@windesheim.nl)).
