* In March, **AIESEP** members from six countries on four continents put together their expertise and effort in preparing and submitting a proposal in response to the call entitled "ONE RESOURCE KIT FOR TEACHERS." This document will be promoted by the World Anti-Doping Agency (WADA). The project is aimed at developing a resource, designed to help teachers deliver their existing curriculum requirements for values education. This resource uses sport and its positive values as a context to secure interest from the pupils, and it will be developed on solid scientific bases, implemented with different kind of resources (e.g. didactic units, values-based games, teaching hints, a glossary), and finally tested among educators of various countries. **AIESEP'S** large network provides the opportunity to carry out this project on all continents, providing information on curricula requirements from culturally and geographically distinct situations. The project will start in the next months and last one year. During this period, involved **AIESEP** members will challenge the field of sport values, foster discussion and debate, enhance their own tools, become better connected, and, hopefully, inspire change in sport pedagogy.
